

## Product information according to Commission regulation (EU) No 66/2014

| Attribute Name                                                                                                                            | Position | Symbol         | Value               | Unit  |
|-------------------------------------------------------------------------------------------------------------------------------------------|----------|----------------|---------------------|-------|
| Model Denomination                                                                                                                        |          |                | KIV644<br>949599121 |       |
| Type of hob                                                                                                                               |          |                | Built-In Hob        |       |
| Number of electric cooking zones                                                                                                          |          |                | 4                   |       |
| Number of electric cooking areas                                                                                                          |          |                | 2                   |       |
| Heating technology (induction cooking zones and cooking areas, radiant cooking zones, solid plates) per electric cooking zone and/or area |          |                | Induction           |       |
| Energy consumption for the hob calculated per kg                                                                                          |          | ECelectric hob | 183.9               | Wh/kg |

### EN 60350-2 - Household electric cooking appliances -- Part 2: Hobs - Methods for measuring performance"

Suggestions for a correct use in order to reduce the environmental impact:

- When you heat up water, use only the amount you need.
- If it is possible, always put the lids on the cookware.
- Before you activate the cooking zone put the cookware on it.
- Put the smaller cookware on the smaller cooking zones.
- Put the cookware directly in the centre of the cooking zone.
- Use the residual heat to keep the food warm or to melt it."
